IN TUNE WITH DOWN SYNDROME

5 ways to use music in therapy

1. Chant math facts, counting, & letter sounds to a beat or sing to a melody.
2. Teach piano to help with fine motor skills & color code the notes & keys if needed.
3. Have your child help you make up new lyrics to a song to increase time on task.
4. Create pictures that go along with verses in a song & have your student put them in order.
5. Say challenging words or phrases to a slow rhythmic beat & have your child copy you.
