IN TUNE WITH RETT SYNDROME: 5 WAYS TO USE MUSIC IN THERAPY

1. Play eye-catching instruments, such as an ocean drum, in different positions to help visual tracking.

2. Use pictures of favorite songs, instruments, or singers during choice making.

4. Add music instrument sound effects to stories to gain attention and focus.

5. Record the last word of a song on a switch & have her fill in the blank.

Somewhere over the E-I-E-I-O...
